

HOW TO PREVENT IDENTITY THEFT AND KEEP YOUR INFORMATION SAFE

At Payoneer, we know that we're in the trust business, and that a large part of that trust is in knowing that your funds are safe when you work with us.

Payoneer's technology, operations and experience have proven invaluable in preventing all kinds of cyberattacks targeting our users. Our combination of security tools and risk management capabilities protect you from account takeover attacks.

Duplicate-site tracking

Proactive user-account searches

FOR USERS, THERE ARE A FEW EASY STEPS THAT YOU CAN TAKE TO PREVENT ACCOUNT TAKEOVERS:

1

Make sure you use a unique **password** whenever subscribing to a new online service

2

Never provide your **security details** (such as password and username) to anyone

3

Hover over **hyperlinks** in emails and check if their URL includes a misspelling of a famous internet website, for example: www.bankofarnerica.com - the letter "m" is actually two letters "r" and "n"

4

Don't open **attachments** that you did not expect or that don't make sense in connection to the sender's email address

5

Check your payment and transaction **history** regularly

6

Avoid using **public computers** when your financial information is involved

7

Keep your **anti-virus** software updated and invest in reliable security software
